

Trauma-Informed Care + Affordable Housing = Housing Stability

In Case You Missed It: CDC Vaccine Implementation Guidance for People Experiencing Homelessness

CDC has released interim guidance for health departments on vaccination implementation for people experiencing homelessness. This guidance offers implementation strategies to improve delivery of COVID-19 vaccination services to people experiencing homelessness, including considerations related to how and where vaccines are administered, logistics for vaccination events, and strategies for documenting doses and conducting second-dose reminders.

Guided Discussion Tool for Identifying Education and Career Goals and Supports with Youth and Young Adults

This new tool from ED/NCHE may be used by service providers working with youth and young adults (YYA) experiencing homelessness to guide YYA clients through a discussion of their interests and skills. The tool uses motivational interviewing questions to help determine the client's interest in pursuing education, provides online resources to help the client explore education and career pathways and determine possible pathway options in areas of interest, includes information on how to pay for higher education, and recommends next steps towards the client's goals.
