

Manufacturing & Safety Training Program

“Position Yourself for Competitive Employment in the Manufacturing Industry!”

This program includes forklift operator and safety training, general industry safety training, as well as a certification in manufacturing orientation. Individuals also receive detailed classroom instruction along with hands-on forklift operation and OSHA 10 safety instruction.

TOPICS INCLUDE:

- Forklift safety and operation
- 10 hours of general safety training on a variety of topics
- Resume skills, interview skills, and opportunities to interview with potential employers

Attend an information session to get started TODAY!

Classes start September 7th – 30th
